

HOW TO BACKUP YOUR ZEGEMMA H9.2H IMAGE

1. UPDATE YOUR ZGEMMA H9.2H IMAGE OF OPENATV

1.1 download the openatv zgemma h9.2h image from the link:

<http://images2.mynonpublic.com/openatv/current/index.php?open=zgemmah92h>

1.2 unzip the file and copy to your usb stick root directory

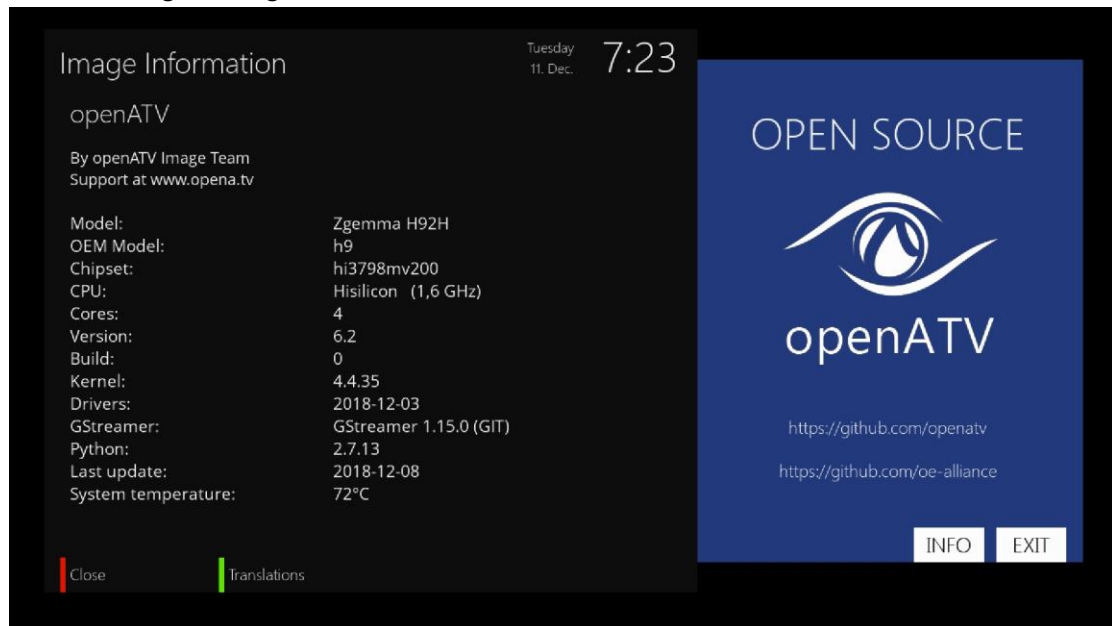

名称	修改日期	类型	大小
h9	2018-12-09 5:34...	文件夹	
bootargs.bin	2018-12-09 5:34...	BIN 文件	64 KB
fastboot.bin	2018-12-09 5:34...	BIN 文件	770 KB

1.3 plug the usbstick to the rear panel usb jack

1.4 press the rear panel reset key and power on

release the reset key you will see the air logo led will display flash red and white and auto start

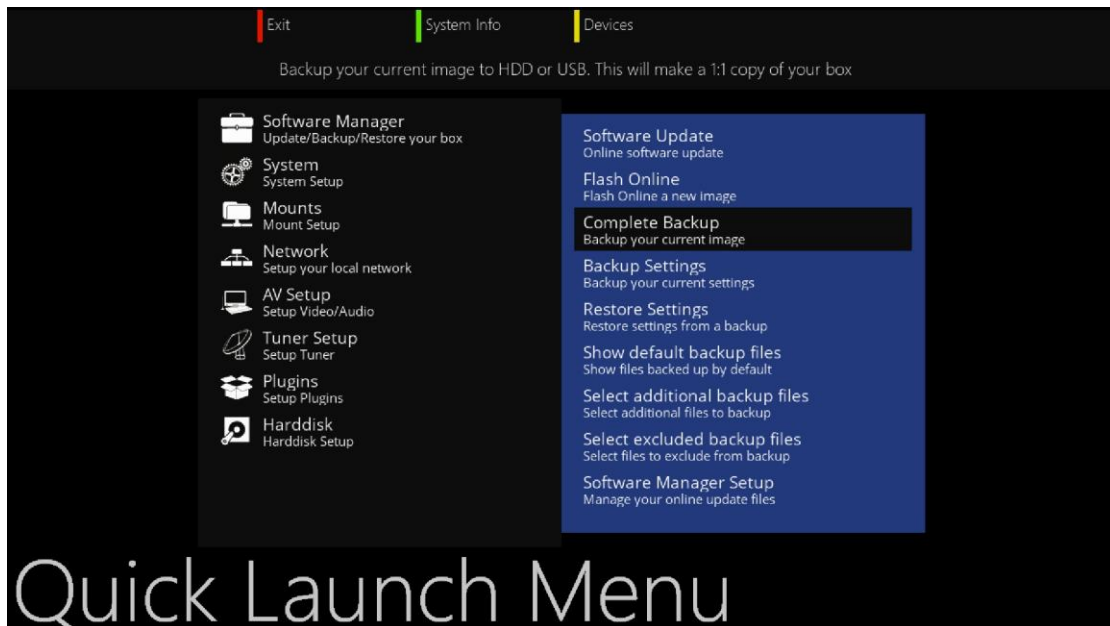

1.5 the image info e.g.

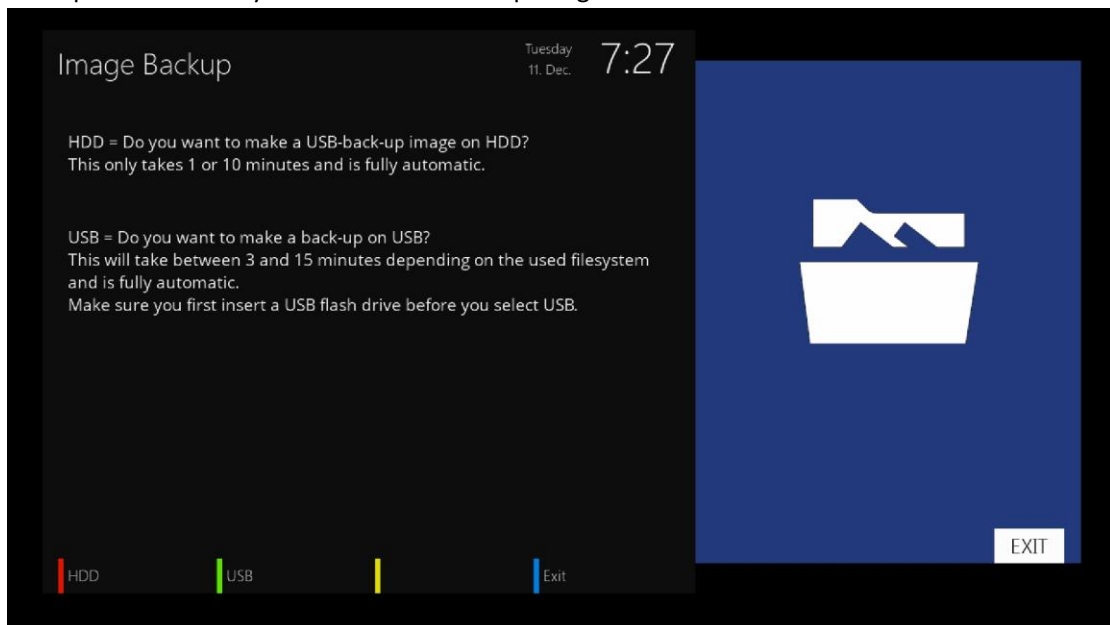

2. BACKUP YOUR ZGEMMA H9.2H IMAGE FILE

2.1 when you want backup your image, please press the rcu blue key

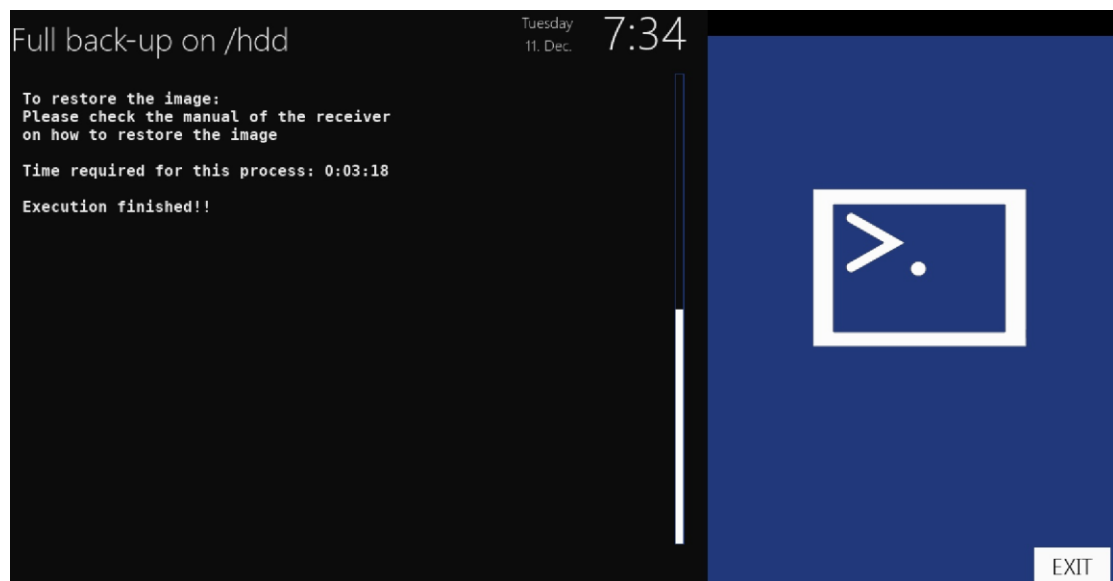

2.2 select the complete backup to make your image

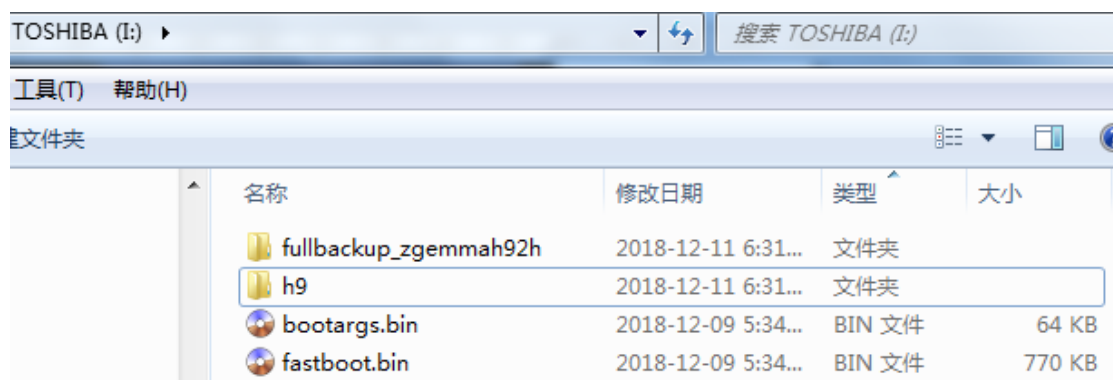

2.3 press rcu red key to make a usb-back-up image

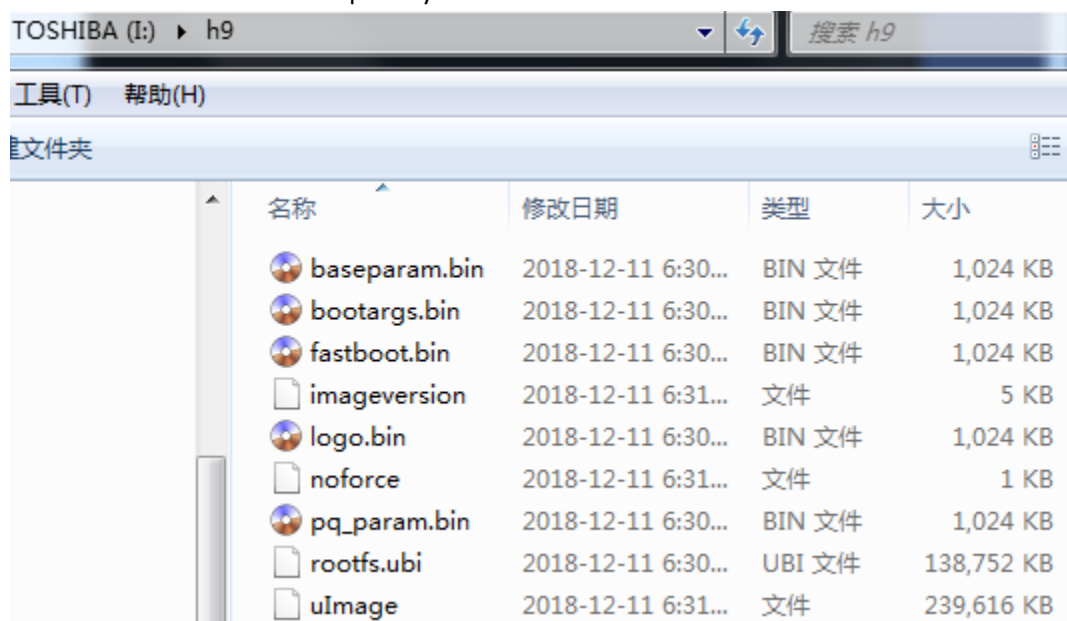

2.4 in the end you will see your image is in the usb

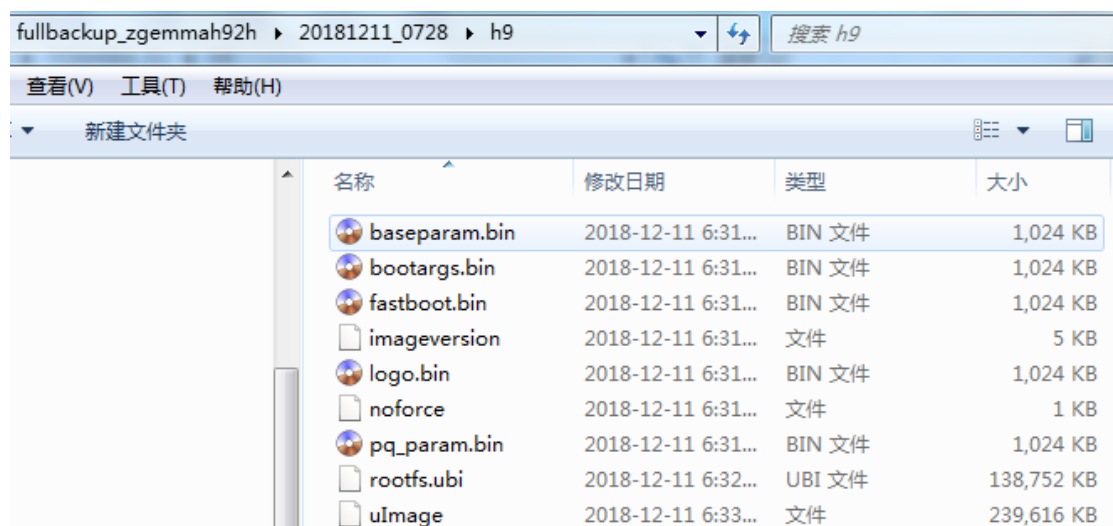

2.5 insert the usb stick to your pc. the image directory is here

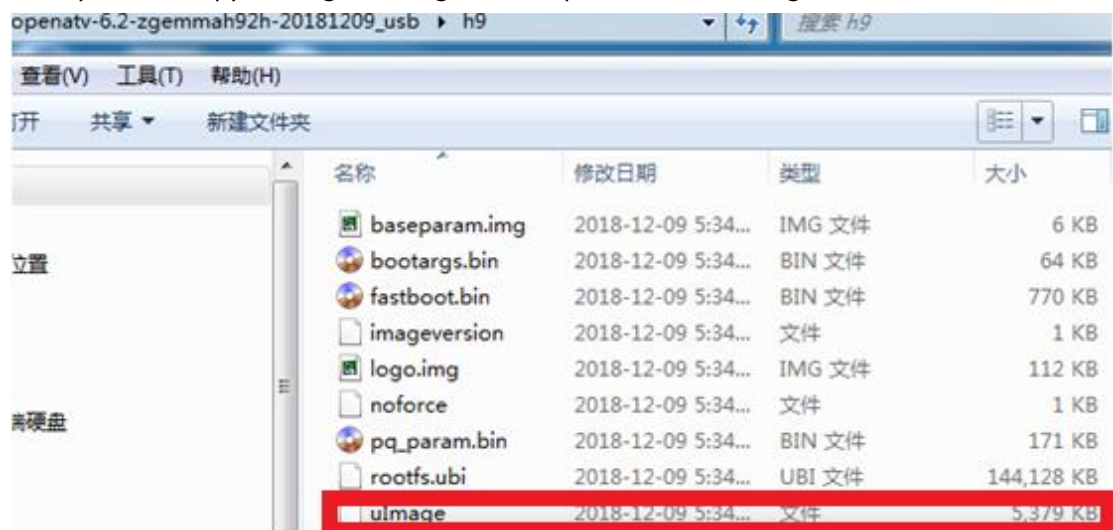

2.6 note now the h9 directory and the fullbackup_zgemmah92h directory there are same file inside but it can't be used to update your box

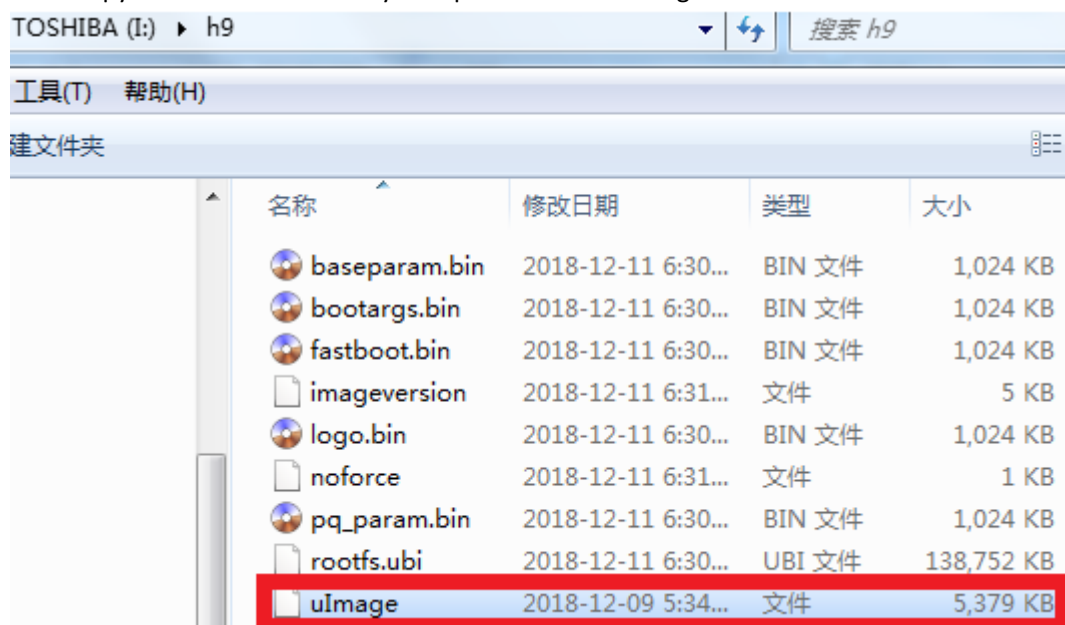

2.7 you need copy the origine ulmage file to replace the new ulmage file

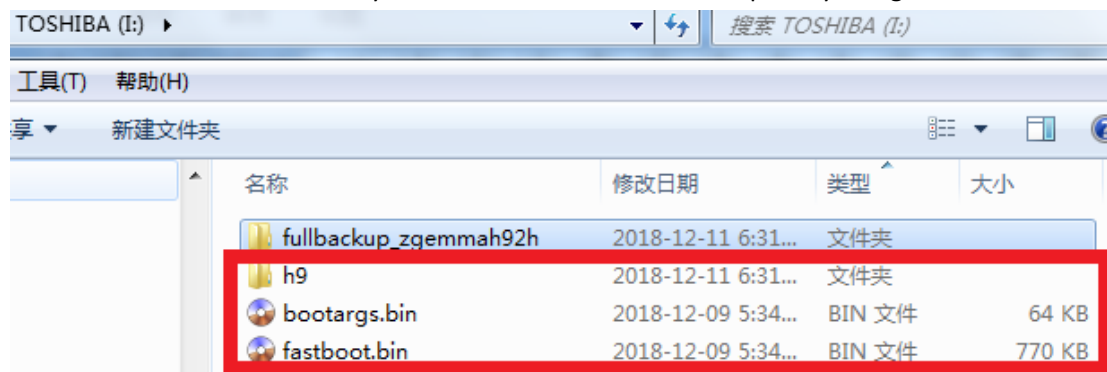

2.8 copy this file to h9 directory to replace the new ulmage file

2.9 now you have a image file

it include the h9 directory and 2 bin file and can be used update your zgemma h9.2h box

You can zip the file to store. here the fullbackup_zgemmah92h directory can delete or store as a backup.
